

§2.8 Simplification of wholesale electric rate schedule filings.

(a) In making changes in rate schedules required to be on file with the Commission, public utilities may find it advantageous to file substitute sheets to reflect changes, in lieu of filing rate schedule supplements.

(1) *Identification—substitute sheets.* (i) At the top right of the page, the sheet number may be designated as “_____ Revised Sheet No. _____”, followed by “Superseding _____ Sheet No. _____”. The first of these blanks would show the number of the revision (i.e., first, second, etc.) and the sheet number would be the same as the sheet replaced. The third and fourth blanks would be filled according to the numbering of the sheet replaced.

(ii) Sheets which are to be inserted between two consecutively numbered sheets may be designated “Original Sheet No. _____”, with the blank space filled with the appropriate number and a letter to indicate an insertion (i.e., between Sheet Nos. 1 and 2, Original Sheet No. 1a).

(iii) Customer agreement, if required, may be indicated on the bottom of the page, by the signature of the person authorized to agree to the proposed change. The name and title of the person authorized to file the substitute sheet may also be shown on the bottom of the page.

(b) Whenever pursuant to §35.12 of this chapter an initial rate schedule filing is to be made, or whenever pursuant to §35.13 of this chapter a rate schedule is to be replaced in its entirety or extensively revised (for example if a large number of the pages are to be changed), public utilities may find it advantageous to use a simplified format, such as the following:

(1) *Format.* A brief service agreement setting forth such items as the name of the purchaser, service to be rendered, term of the agreement, and signatures of the parties. Applicable points of delivery and delivery voltages, applicable rates and charges and applicable terms and conditions may be incorporated in the agreement by reference to separate appendices attached thereto as follows:

(i) Appendix setting forth in detail delivery points, delivery voltages and metering voltages.

(ii) Appendix containing a statement of the rates and charges, set forth separately under appropriate headings such as: Demand charges, energy charges, billing demand determinants, power factor clauses, minimum bill provisions, etc.

(iii) Appendix containing terms and conditions, set forth separately under appropriate headings such as: Services, facilities at the points of connection, meter adjustments, continuity of service, liability, etc.

(2) *Identification.* (i) At the top right of the page, the sheet number may be designated as “Original Sheet No. _____”.

(ii) Sheets which are to be replaced or inserted may be designated in the same manner suggested in paragraph (a)(1) of this section.

§2.9 Conditions in preliminary permits and licenses—list of and citations to “P—” and “L—” forms.

(a) The Commission has approved several sets of standard conditions for normal inclusion in preliminary permits or licenses for hydroelectric developments. In a special situation, of course, the Commission in issuing a permit or license for a project will modify or eliminate a particular article (condition). For reference purposes the sets of conditions are designated as “Forms”—those for preliminary permits are published in Form P-1, and those for licenses are published in Form L’s. There are different Form L’s for different types of licenses, and the forms have been revised from time to time. Thus at any given time there will be several series of standard forms applicable to the various vintages of different types of licenses. The forms and their revisions are published in the Federal Power Commission reports and citations thereto are listed below.

(b) New or revised forms may be approved after preparation of this list (which is current as of October, 1975) and consequently do not appear herein. Forms currently in use, including

§ 2.12

18 CFR Ch. I (4–1–02 Edition)

those forms which have not yet appeared in the FPC reports, may be obtained from the Federal Power Commission, Office of Public Information, Washington, DC 20426.

(c) Within each of the categories, unless retired, the last-listed form is the one in use at the date of preparation of the list. The dates in the list represent issuance dates of the orders with which the particular forms were first published, or subsequently revised, in the FPC reports.
